

ENGAGE

COMMERCIAL FIT OUTS

BRAND GUIDELINES

Strategy, identity and communication standards

VERSION 1.0 | JULY 2026

Brand foundation

The commercial logic behind the identity.

BRAND IDEA

Transforming underperforming commercial property into market-ready workspace.

Business definition

Engage Commercial Fitouts is an end-to-end commercial renovation and fit-out company. Its core investor proposition is simple: acquire an outdated, run-down or shell-condition office, allow Engage to design and deliver the complete transformation, then return the property ready for occupation, leasing or resale.

The company also serves owner-occupiers, landlords, tenants, asset managers and businesses that need the same complete fit-out capability without a property-flipping objective.

Primary audiences

- Commercial property investors seeking to improve asset value and saleability.
- Office owners and landlords repositioning vacant or dated units.
- Businesses relocating, expanding or upgrading their workplace.
- Brokers, property advisers and asset managers needing a dependable delivery partner.
- Developers and operators requiring repeatable commercial fit-out capacity.

Value proposition

One accountable partner for strategy, concept, design, approvals coordination, construction, MEP, HVAC, finishes, furniture, installation and final handover. The brand must communicate control, commercial intelligence and delivery certainty rather than decorative interior design alone.

POSITIONING LINE

From commercial shell to sale-ready office.

Positioning and personality

Premium enough to inspire confidence, practical enough to win projects.

WE ARE

Commercially minded
Decisive
Precise
Modern
Accountable
Design-aware
Execution-led

WE ARE NOT

Flashy luxury theatre
Residential décor-led
Vague or conceptual
Cheap contractor language
Overly corporate
Trend-chasing
Gold-everywhere extravagance

Brand promise

Engage makes commercial property transformation easier to assess, easier to manage and easier to bring to market. Every expression of the brand should reinforce a sense that the project is controlled from first appraisal to final handover.

Brand pillars

COMMERCIAL CLARITY

Recommendations should connect design and construction decisions to usability, marketability, programme and asset value.

END-TO-END CONTROL

The client should experience one organised delivery journey, not a loose collection of trades and suppliers.

DESIGN WITH PURPOSE

Aesthetic decisions must improve function, buyer appeal and workplace quality, not merely photograph well.

RELIABLE EXECUTION

Documentation, communication, site standards and handover quality should make confidence visible.

Logo system

Use the identity with restraint. It already has enough confidence without being shouted at people.

Primary logo

The preferred mark is the complete ENGAGE wordmark with the descriptor COMMERCIAL FIT OUTS beneath it. Use it on black or near-black backgrounds whenever practical. This is the strongest and most distinctive presentation of the brand.

Logo hierarchy

- Primary lock-up: full wordmark and descriptor for website headers, proposals, signage and formal communications.
- Wordmark only: suitable where the business name is already clear or space is limited.
- E symbol: suitable for favicons, social avatars, document folios and small-format applications.
- Monochrome version: white on dark or black on light where colour reproduction is unavailable.

Clear space and minimum size

Maintain clear space around the logo equal to the height of the middle gold bar in the E symbol. Do not allow text, edges, photographs or interface controls to enter this area. As a practical digital minimum, use the full lock-up no smaller than 180 px wide; below that, use the wordmark or E symbol.

Never

- Stretch, compress, rotate or redraw the mark.
- Change the gold accent to another colour.
- Add shadows, outlines, bevels or metallic effects.
- Place the full logo over busy imagery without a solid protective field.
- Alter the spacing between ENGAGE and COMMERCIAL FIT OUTS.

Colour palette

A disciplined black, white and architectural gold system.

ENGAGE BLACK

HEX #050505 | RGB 5 / 5 / 5

Primary backgrounds, headers, signage

ARCHITECTURAL GOLD

HEX #B79A62 | RGB 183 / 154 / 98

Accents, rules, key highlights

WARM IVORY

HEX #F6F3ED | RGB 246 / 243 / 237

Soft page and section backgrounds

PURE WHITE

HEX #FFFFFF | RGB 255 / 255 / 255

Primary text on dark, clean space

CHARCOAL

HEX #222222 | RGB 34 / 34 / 34

Body text and secondary dark areas

STONE GREY

HEX #6B6B6B | RGB 107 / 107 / 107

Supporting text and interface labels

Recommended balance

Use approximately 55% black or charcoal, 30% white or ivory and 15% gold and neutral accents across branded compositions. Gold should guide attention, not flood the page. Excessive gold makes a serious fit-out business resemble a perfume counter, which is not the strategic objective.

Accessibility

Use white or ivory text on black for high-contrast content. Use charcoal or black text on white and ivory. Avoid using gold for small body text on a light background; reserve it for larger headings, rules, icons and emphasis.

Typography

Modern, geometric and highly legible across proposals, web and site documentation.

PRIMARY TYPEFACE

Inter Display for headlines. Inter for body copy, labels, forms and technical content.

Why this system works

The logo uses wide, geometric letterforms and generous spacing. Inter complements that character while remaining practical for long documents, drawings, digital interfaces and commercial proposals. It is widely usable and does not compete with the custom wordmark.

LEVEL	STYLE	SIZE	USE
DISPLAY	Inter Display Bold	36-64 pt / 42-72 px	Major campaign and homepage statements
H1	Inter Display Bold	28-36 pt / 36-48 px	Page titles
H2	Inter Display SemiBold	18-24 pt / 26-34 px	Section titles
BODY	Inter Regular	10-12 pt / 16-18 px	Long-form copy and descriptions
LABEL	Inter SemiBold, uppercase	8-10 pt / 12-14 px	Eyebrows, navigation and technical labels

Typesetting rules

- Use sentence case for most headings.
- Use uppercase sparingly for short labels and navigation.
- Give major headings generous breathing room.
- Keep paragraphs short and commercially direct.
- Avoid decorative scripts, condensed display fonts and faux-luxury serif pairings.

Photography and imagery

Show transformation, workmanship and commercial potential, not staged fantasy offices.

Core image categories

- Before-and-after commercial spaces photographed from matched or clearly comparable viewpoints.
- Empty shells, dated offices and work-in-progress environments that demonstrate transformation potential.
- Finished offices with credible lighting, materials, furniture and realistic occupancy cues.
- Detail photography of joinery, ceilings, MEP integration, finishes and installation quality.
- Architectural Dubai context used selectively: business districts, towers, commercial lobbies and office views.
- Project teams and site activity shown naturally, with proper PPE and no forced stock-photo handshakes.

Visual treatment

Use clean architectural framing, realistic colour, natural contrast and controlled warmth. Black overlays may be used behind white typography. Gold may appear in graphic rules, captions or subtle gradients, but should not be artificially painted into photographs.

Avoid

- Obviously AI-generated interiors or impossible architecture.
- Generic residential living rooms, villas or removal imagery.
- Overly glossy luxury imagery that misrepresents project budgets.
- Empty mood-board imagery with no connection to delivery.
- Excessive skyline clichés and landmark dependence.

IMAGE TEST

Could a commercial investor, landlord or office decision-maker believe this is a real project Engage could assess, deliver and hand over?

Tone of voice

Confident, commercially literate and specific.

How Engage should sound

Write as an experienced project partner who understands property, workspace and delivery. Explain what will happen, why it matters commercially and what the client receives. Confidence should come from clarity, not exaggerated claims.

PREFER	AVOID
We transform dated and shell-condition offices into complete, market-ready commercial spaces.	We create breathtaking dream offices that redefine luxury.
One coordinated team from concept and approvals through fit-out and handover.	We take care of everything so you never need to worry.
Designed around buyer appeal, workplace function, programme and budget.	Bespoke solutions tailored to your unique vision.
Clear scope, managed delivery and a defined handover standard.	Best-in-class quality at unbeatable prices.

Messaging priorities

- Lead with the commercial outcome.
- Explain the end-to-end scope.
- Make process and accountability visible.
- Support claims with projects, details, timelines and evidence.
- Use plain English and define technical terms when needed.

Suggested brand lines

- Commercial spaces, transformed.
- From shell to sale-ready.
- Fit-out built around commercial value.
- One partner. Complete commercial transformation.
- Designed to perform. Delivered to market.

Audience messaging

One capability, expressed through different commercial motivations.

PROPERTY INVESTORS

Increase the appeal, usability and market readiness of acquired commercial units through a fully managed transformation.

LANDLORDS AND ASSET OWNERS

Reposition dated or vacant offices to compete more effectively for buyers and tenants.

OWNER-OCCUPIERS

Create a complete workplace aligned with operational needs, brand standards and future growth.

TENANTS AND CORPORATE TEAMS

Plan and deliver a workplace move or refurbishment with one accountable fit-out partner.

BROKERS AND ADVISERS

Give clients a credible route from acquisition or vacancy to a finished, marketable commercial space.

Master elevator statement

Engage Commercial Fitouts transforms outdated, vacant and shell-condition offices into complete commercial spaces. We manage the process from initial assessment and design through construction, MEP, HVAC, furniture and handover, helping investors, landlords and businesses bring better offices to market or into operation.

Digital and website direction

The website should behave like a commercial sales tool, not an online interior-design scrapbook.

Homepage priorities

- Immediately define the end-to-end commercial fit-out offer.
- Separate investor-led transformations from direct business fit-outs without presenting them as unrelated businesses.
- Show credible transformation imagery and completed projects.
- Explain the process from assessment to handover.
- Provide clear routes to request a site assessment, project consultation or budget discussion.

Recommended navigation

Home | Investor Fit-Outs | Commercial Fit-Out Services | Sectors | Projects | Process | About | Insights | Contact

Interface style

- Black or charcoal navigation with restrained gold active states.
- Large white space and modular editorial layouts.
- Strong project imagery balanced by diagrams, plans, metrics and process content.
- Gold used for calls to action, dividers and selected icons.
- Avoid excessive animations, rounded consumer-style cards and decorative gradients.

Primary calls to action

- Request a Project Assessment
- Discuss an Investment Fit-Out
- Book a Site Consultation
- Submit a Commercial Space
- View Our Delivery Process

Applications and governance

Consistency is cheaper than repeatedly inventing the brand again. A discovery humanity has resisted for centuries.

Priority applications

- Website and landing pages
- Investment fit-out proposal deck
- Commercial quotation and scope documents
- Company profile and capability statement
- Project case studies
- Site hoarding and signage
- Email signatures and business cards
- Social media templates
- Tender submissions and prequalification documents
- Project handover packs

Document system

Use black title pages, white or ivory content pages, gold section numbering and restrained architectural lines. Tables should be clean and functional. Photography should be captioned with location, scope, project type and completion status where approved.

Approval rules

- Use only approved logo files.
- Do not create new colour variations without brand approval.
- Check technical accuracy before publishing project claims.
- Obtain permission before naming clients, buildings or commercial values.
- Review all external materials for tone, spacing, image credibility and call-to-action consistency.

THE STANDARD

Every brand touchpoint should make Engage feel organised, commercially intelligent and capable of controlling a complete fit-out from opportunity to handover.
